Mobile advertising rules in Spanish municipalities

Status of six formats in 30 municipalities, read from each council's own ordinances. "—" means the texts we read do not mention the format; it does not mean the format is allowed. Five places whose rules we could not yet read are listed separately at the end and are not assessed. Full rules, article numbers and sources for each place are on the city pages. This is an initial research sample, not a national survey, and describes rules rather than giving legal advice.
